3FOLD EFFECTIVELY.

- SAVE UP TO 12% ON HEATING ENERGY
- REDUCE HEAT INTAKE UP TO 78%
- IMPROVE THE ACOUSTIC QUALITY AND REDUCE AMBIENT NOISE

ENJOY SUN PROTECTION AND PRIVACY WITH A PREMIUM QUALITY PRODUCT RATED FIRST CLASS BY FRAUNHOFER IBP.

Do you want to be comfortable despite the scorching summer heat? DUETTE® Shades make it possible. The DUETTE® Shades' Climate Zone cells protect against heat radiation, and reduce heat intake at the window by up to 78%.

In the winter DUETTE® Honeycomb shades can save up to 12% on heating energy. DUETTE® Shades have won several awards and a first class rating for their temperature control features.

DUETTE® Shades have extremely high sound-absorbing properties for acoustic comfort, even when there is a large amount of glass, ceramic and concrete in the room. According to Fraunhofer IBP, only DUETTE® Shades can bring reverberation to an optimal range.

** DUETTE® Shades have been tested by **Fraunhofer IBP** in a comprehensive study.*

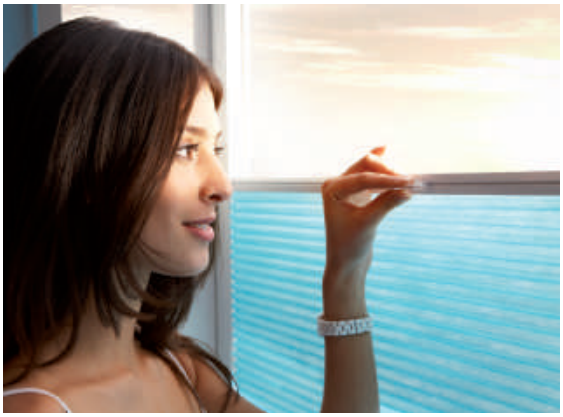
IBP reports ESB-004/2011 HOKI & S 10 349

DURING THE SUMMER, SOLAR HEAT INTAKE AT THE WINDOW CAN BE REDUCED BY UP TO 78%.*

* Fraunhofer IBP Study ESB-004/2011 HOKI

GLARE PROTECTION!

With DUETTE® Shades you can enjoy the sun without being hindered by bright and unwanted glare.



DUETTE® SHADES – SUN PROTECTION AT ITS BEST.

- Block the harsh quality of light.
- Reduce and regulate the brightness of sunlight.
- Protect furniture and interiors from fading.
- No visible cords or holes.

DURING THE WINTER, REDUCE UP TO 46% OF ENERGY LOSS AT THE WINDOW, AND SAVE UP TO 12% ON HEATING BILLS.*

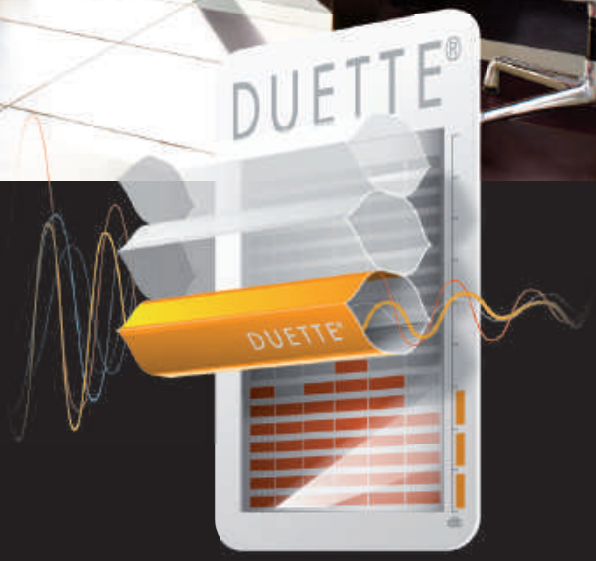
OUTSTANDING PRIVACY

DUETTE® Shades provide the highest degree of privacy when you need it, keeping the light in, but prying eyes out.

DUETTE® SHADES IMPROVE THE ROOM ACOUSTICS SIGNIFICANTLY AND MEASURABLY.*



* Fraunhofer IBP report S10349

DUETTE® Shades effectively absorb ambient noise! Whether at home, in the office, at medical centers or canteens, in any environment where acoustics are important, versatile DUETTE® Shades offer the best solution. In fact, in many cases only DUETTE® Shades can reduce the reverberation level to the optimal range.

In modern architecture and interior design where surface materials like concrete, glass and metals are used, the poor acoustics are often discovered retrospectively.

Additionally, in contrast to conventional soundproofing measures, DUETTE® Shades complement any interior design.

THE POSSIBILITIES ARE ENDLESS

THE PERFECT SOLUTION FOR EVERY WINDOW

DUETTE® Shades are a perfect solution for any window shape, from circles to vertical windows, conservatories and skylights. The hardware system can be attached to window frames, vinyl windows, glass bars, and wall or ceiling, without having to drill.

THE PREMIUM QUALITY OF DUETTE® SHADES ENHANCES YOUR WINDOW DECORATION AND GUARANTEES A LONG LIFESPAN.

VERSATILITY IS THE ESSENCE OF DUETTE® SHADES.

There is no limit to the design options with DUETTE® Shades. Combine for example different transparencies in one blind with the Day & Night System or combine contrasting colours and materials – the possibilities are endless!

Create beautiful elegance with silk gloss fabrics such as Elan. Angelhair fascinates as the subtle texture of the fabric create soft light structures. These patterns add a beautiful subtle detail.

VERY GOOD REASONS FOR DUETTE® SHADES THE ORIGINAL WITH CLIMATE ZONE

Only DUETTE® Shades offer beautiful window decoration, stylish climate control and optimal sound absorption. DUETTE® Shades are distinguished by their excellent quality and workmanship, beautiful design, and wide range of colours and fabrics.

OPTICS AND FUNCTION

- Natural daylight is filtered and diffused twice by the DUETTE® Shades honeycomb construction.
- The honeycomb design ensures crisp and even pleats, even on the largest shades.
- Without light holes and visible cords in the fabric.
- Large selection of fabrics in trendy colours.
- Wide range of translucent and opaque flame retardant fabrics (DIN 4102 B1).

VISIBILITY AND GLARE PROTECTION

- Different transparencies for any purpose including privacy.

COLD PROTECTION

- During the winter you can reduce energy loss at the window by up to 46%, and save up to 12% of heating energy.

HEAT PROTECTION

- Perfect sun and heat protection in the summer. DUETTE® Shades reduce heat intake at the window by up to 78%, saving energy needed for air conditioning and fans.

SOUNDPROOFING

- Due to the high fabric quality, room acoustics are improved significantly and measurably.

TECHNOLOGY

- Maintenance-free technology, and a comprehensive selection of window shades and operating systems.
- Control sunlight and privacy with the Day & Night system for DUETTE® Shades. Combine room darkening or semi-opaque fabric for the nights, and a translucent shade to bathe the room in soft light during the day.

ENVIRONMENTAL PROTECTION AND SUSTAINABILITY

- Save energy and protect the environment with the highly energy efficient DUETTE® Shades.
- The DUETTE® Shades fabrics are certified according to the Oeko-Tex® Standard 100 for product class IV.
